### Amadeus
**Frontend Developer**
10/2021 - Present
Istanbul, Turkey

Lufthansa Booking App (Angular)

*This application offers users a range of features, including flight search, ticket booking and purchase, online check-in, travel notifications, loyalty program benefits, luggage tracking, and access to flight status and airport information. It simplifies the travel experience with practical features such as cancellation and change transactions. The user-friendly interfaces and secure payment systems enhance accessibility and effectiveness in travel planning for the Lufthansa Group, encompassing Swiss, Austrian, Brussels, and Lufthansa Airlines, as well as the Miles&More product.*

### Adesso
**Frontend Developer**
01/2020 – 10/2021
Istanbul, Turkey

Akbank Mobile and Web Application (React, React Native)

*Providing users with essential banking transactions, this application enables account balance inquiries, money transfers, bill payments, loan applications, and investment tracking. Additionally, it offers a comprehensive suite of services, including access to ATM and branch information, card transaction management, account transaction details, and real-time stock market and foreign exchange tracking.*

Turkcell Kopilot Filom (React)

*Designed for drivers and vehicle owners, this application allows users to monitor their vehicles current location, driving performance, speed information, and idle status. The system provides feedback to drivers on their safe driving behavior, assigning a driving score based on factors such as sudden acceleration, sudden braking, and hard turns. This approach enables users to manage their fleets more effectively and systematically, enhancing overall control and safety.*

SEC Market Portal (React)

*A web-based dashboard application is designed to ensure effective management of the sales store. It offers reporting functionality along with basic CRUD operations, user management, product, customer, order and stock management modules. Along with its user-friendly interface, mobile compatibility and security measures, it also has developer-friendly features. It provides a meaningful interface by visualizing information from various data sources and enables real-time monitoring.*

### Turkish Coast Guard
**Helicopter Pilot**
